

ENVIRONMENTAL
CLEARANCE

Government of India
Ministry of Environment, Forest and Climate Change
(Issued by the State Environment Impact Assessment
Authority(SEIAA), Madhya Pradesh)

To,

The Proprietor

SHEKHAR RAGHUVANSHI

F-29-30, Shekhar Villa, Shop No. 6, Scheme No. 54, Vijay Nagar, Indore - 452010

Subject: Grant of Environmental Clearance (EC) to the proposed Project Activity under the provision of EIA Notification 2006-regarding

Sir/Madam,

This is in reference to your application for Environmental Clearance (EC) in respect of project submitted to the SEIAA vide proposal number SIA/MP/MIS/283623/2022 dated 12 Sep 2022. The particulars of the environmental clearance granted to the project are as below.

- | | |
|--|---|
| 1. EC Identification No. | EC22B038MP190589 |
| 2. File No. | 9331/2022 |
| 3. Project Type | New |
| 4. Category | B2 |
| 5. Project/Activity including Schedule No. | 8(a) Building and Construction projects |
| 6. Name of Project | Proposed Commercial Project " Shekhar Commercials" by project proponent as Sameer Real State Pvt Limited Through Rajkumar Takhtani and Project developer as Shekhar Constructions through Shekhar Raghuvanshi |
| 7. Name of Company/Organization | SHEKHAR RAGHUVANSHI |
| 8. Location of Project | Madhya Pradesh |
| 9. TOR Date | N/A |

The project details along with terms and conditions are appended herewith from page no 2 onwards.

Date: 09/11/2022

(e-signed)
Shriman Shukla
Member Secretary
SEIAA - (Madhya Pradesh)

Note: A valid environmental clearance shall be one that has EC identification number & E-Sign generated from PARIVESH. Please quote identification number in all future correspondence.

This is a computer generated cover page.

and Virtuous Environmental Single-Window Hub)

Ref: Proposal No. SIA/MP/MIS/283623/2022, Case No 9331/2022: Prior Environment Clearance for Construction of Proposed "Commercial Project "Shekhar Commercials" at Survey No. 37/1/1, 37/2/2, 38/1, 38/2/1, Pipliyrao, Tehsil & Dist. Indore, (MP) Total Plot Area - 6430.110 sq.m, Total Proposed Built-up Area - 22729.98 sq.m by project proponent as Sameer Real State Pvt Limited through Rajkumar Takhtani and Project developer as Shekhar Constructions through Shekhar Raghuwanshi F-29-30, Shekhar Villa, Shop No. 6, Scheme No. 54, Vijay Nagar, Indore, MP 452010. Email: shekhar.construction@rediffmail.com Mob: Env. Consultant:- Creative Enviro Services, Bhopal (MP)

With reference to above the proposal has been appraised as per prescribed procedure & provisions under the EIA notification issued by the Ministry of Environment & Forests vide S.O. 1533 (E), dated 14th September 2006 and its amendment, on the basis of the mandatory documents enclosed with the application viz., Form -2, Form IA, Conceptual Plan, drawings and subsequently submission of EMP report, PPT& the additional clarifications furnished in response to the observations of the State Expert Appraisal Committee (SEAC) and State Environment Impact Assessment Authority (SEIAA) constituted by the competent Authority.

- i. यह प्रकरण खसरा संख्या 37/1/1, 37/2/2, 38/1, 38/2/1 ग्राम पिपल्याराव, जिला इंदौर में प्रस्तावित वाणिज्यिक परियोजना "शेखर कमर्शियल" के निर्माण के लिए पूर्व पर्यावरण स्वीकृति का है, जिसमें कार्यालय, सुविधाजनक दुकानें, विश्राम कक्ष और कैफेटेरिया शामिल हैं।
- ii. प्रस्तावित स्थल रालामण्डल अभ्यारण्य के 10 किलोमीटर की सीमा के अंदर है इसलिए परियोजना प्रस्तावक द्वारा NBWL से विलयरेस के लिए आवेदन संख्या WL/MP/इन्फ्रा 1402286/2022 के माध्यम से आवेदन किया गया है।
- iii. प्रस्तावित वाणिज्यिक परियोजना के लिए संयुक्त संचालक, नगर तथा ग्राम निवेश, भोपाल के पत्र क्रमांक 1836 दिनांक 16.03.21 द्वारा स्वीकृति जारी की गई है।
- iv. परियोजना का प्रस्तावित बिल्टअप एरिया 22729.98 वर्गमीटर दिया गया है, चूंकि परियोजना का बिल्टअप एरिया 1,50,000 वर्गमीटर से कम है, अतः EIA अधिसूचना 2006 एवं संशोधित के अनुसार प्रकरण 8(a) श्रेणी के अंतर्गत विचार किया गया है।
- v. राज्य स्तरीय विशेषज्ञ मूल्यांकन समिति (SEAC) की 597वीं बैठक दिनांक 06.10.2022 में उक्त प्रकरण को NBWL से विलयरेस के अधीन विशेष शर्तों सहित पर्यावरणीय स्वीकृति जारी किये जाने हेतु अनुशंसा की गई है। जिसका विवरण उक्त बैठक के कार्यवाही विवरण के पृ.क्र. 06 से 18 पर अंकित है।
- vi. परियोजना का विवरण :-

Total Land Area	Total Land Area = 6430.110 sq mtrs
Total Built up Area	Total Proposed Built Up area (Slab Area Including all common passages, parking, podium etc.) = 22729.98 sq. mtrs
Land Owner of the Project	Sameer Real State Pvt Limited Through RajkumarTakhtani
Promoters of the Project	Shekhar Constructions through Shekhar Raghuwanshi
Location of Project	Khasra No 37/1/1, 37/2/2, 38/1, 38/2/1 Pipliyrao, Indore (MP)

Latitude	22°41'5.80"N - 22°41'8.32"N
Longitude	75°51'28.49"E - 75°51'34.73"E
Number of commercials	133
Total Water Requirement	207.370 KLD
Net Fresh Water Requirement	70.880 KLD
Total Waste Water Generation	158 KLD
Power Requirement	1779 KVA
Backup Power facility	01 No. X 600 KVA & 1 No. X 250 KVA DG Set
Solid Waste generation	525 Kg / Day
Parking area	5973.14sqm
Parking Number	196
Area under Green belt	610 sq mtrs
Area under Road	2190.60sqm

vii. एरिया स्टेटमेंट :-

S No	Particular	Permissible	Proposed
1	Organized Open Area	210.00 SQ .M	210.00 SQ .M
2	Services Area	64.30 SQ. M	119.37 SQ. M
3	Maximum Far	1:2.0	1:2.0
4	Road & Circulation Area	2190.60	2190.60
5	Maximum Ground Coverage	40%	18.54%
6	M O S Maximum Distance between Two Blocks	F-12 MTR R-7.50 MTR S1-7.50 MTR S2-7.50 MTR	F-12 MTR R-7.50 MTR S1-7.50 MTR S2-7.50 MTR
7	Maximum Height	30 MTS	30 MTS
8	Total Area of land	6430.00 SQ. M	6430.00 SQ. M
9	Total Built up area including built-up area as per T & CP norms or MPBVR 2012	11954 SQ . M	11652.42 SQ. M
10	Total Built up area including built-up area of stair cases, balcony, basements & other services area which does not considered for calculation wrt T&CP & MPBVR 2012	-	22729.98 sqm

A.	Total Plot Area	6430.00 SQ. M
B.	Less Plot Area under coordination Road	869.95 SQ. M
C.	Net Plot Area	5560.16 SQ. M
D.	Permissible Ground Coverage (25% Of C)	1390.04sqm
E.	Proposed F.A.R. Ground Coverage	1030.96 SQ.M
F.	Permissible F.A.R. (1.00 Of C)	2.15
G.	Proposed F.A.R.	2.09
H.	Area Of L.I.G. Flats (10% Of G)	N,A,
I.	Open Area Permissible (Min.) 10%	556.01
	Open Area Proposed	610.04

J.	Services Area > Sump well & OH Tank > STP & Collection Tank > Rainwater Harvesting > Garbage Disposal > Service Block (Substation, DG Set, etc.) Total Services Area	<ul style="list-style-type: none"> • Fire Reservoir – 2,00,000 Lit • Raw Water –1,50,000 Lit (Comm. & hotel) • Domestic Water –2,20,000 Lit • STP–175 KLPD & Collection Tank–90 KLD • 1 No of 3m Dia and 4m Depth • Yes As per Norms Approx
K.	Permissible Height	30

	Total Built Up Area	22729.98 sqm

Based on the information submitted at Para i to Vii above, the State Level Environment Impact Assessment Authority (SEIAA) considered the case in its 754th meeting held on 27.10.2022 and decided to accept the recommendations of 597th SEAC meeting held on dated 06.10.2022.

Hence, Prior Environmental Clearance is accorded under the provisions of EIA Notification dtd. 14th September 2006 & its amendments to the proposed "Commercial Project "Shekhar Commercials" at Survey No. 37/1/1, 37/2/2, 38/1, 38/2/1, Pipliyarao, Tehsil & Dist. Indore, (MP) Total Plot Area - 6430.110 sq.m, Total Proposed Built-up Area - 22729.98 sq.m by project proponent as Sameer Real State Pvt Limited through Rajkumar Takhtani and Project developer as Shekhar Constructions through Shekhar Raghuwanshi F-29-30, Shekhar Villa, Shop No. 6, Scheme No. 54, Vijay Nagar, Indore, MP 452010 subject to the compliance of the Standard Conditions and the following additional Specific Conditions as recommended by SEIAA & SEAC in its meetings.

A. Specific Conditions as recommended by SEIAA

1. परियोजना प्रस्तावक द्वारा प्रकरण में NBWL से अनापत्ति प्रमाण पत्र (Clearance) प्राप्त करने के उपरांत ही किसी प्रकार का निर्माण कार्य किया जायेगा।
2. परियोजना प्रस्तावक द्वारा भूतल पर 610 वर्गमीटर में हरित पट्टी विकास किया जाना प्रस्तावित है, जिसके अंतर्गत 120 पेड़ों का रोपण किया जायेगा। वर्तमान परिदृश्य में परियोजना स्थल पर 04 पेड़ (01 बरगद, 01 जामुन, 01 इमली एवं 01 खजूर) स्थित है, जिन्हें काटा नहीं जायेगा।
3. प्राधिकरण द्वारा यह निर्णय लिया गया भूजल दोहन के स्थान पर यथासंभव नगर निगम से जलापूर्ति करावें। अपरिहार्य स्थिति में भूजल का दोहन करें।
4. PP should ensure linkage with municipal sewer line for disposal of extra treated waste water.
5. Dual plumbing system to be provided for reuse of the treated effluent for flushing and other purposes.
6. The storm water from roof – top, paved surfaces and landscaped surfaces should be properly channelized to the rain water harvesting sumps through efficient storm water network

7. PP should ensure road width, front MOS and side / rear as per MPBVR 2012.
8. The building shall be designed for compliance with earth quake resistance and resisting other natural hazardous.
9. The height, Construction built up area of proposed construction shall be in accordance with the existing FSI/FAR norms of the urban local body & it should ensure the same along with survey number before approving layout plan & before according commencement certificate to proposed work.
10. Wet Garbage shall be composted in Organic waste convertor. Adequate area shall be provided for solid waste management within the premises which will include area for segregation, composting. The Inert waste from the project will be sent to dumping site.
11. **For firefighting:-**
 - a. PP should ensure distance of fire station approachable from the project site. All the required fire fighting arrangement should be made available on the project site as per NBC 2016.
 - b. The occupancy permit shall be issued by Municipal Corporation only after ensuring that all fire fighting measures are physically in place.
 - c. Sufficient peripheral open passage shall be kept in the margin area for free movement of fire tender/ emergency vehicle around the premises
12. Provide solar lights for common amenities like Street lighting & Garden lighting.
13. Electrical charging points for E-Vehicles shall be provided to promote clean energy.
14. The landscape planning should include plantation of native species. The species with heavy foliage, broad leaves and wide canopy cover are desirable. Water intensive and /or invasive species should not be used for landscaping.

B. Specific Conditions as recommended by SEAC

I Statutory Compliance

- i. The project proponent shall obtain all necessary clearance/permission from all relevant agencies including NBWL/ESZ and town planning authority before commencement of work. All the construction shall be done in accordance with the local building byelaws.
- ii. The approval of the Competent Authority shall be obtained for structural safety of building due to earthquakes, adequacy of firefighting equipment etc as per National Building code including protection measures from lightening etc.
- iii. The project proponent shall obtain Consent to Establish/Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/Committee.
- iv. The project proponent shall obtain the necessary permission for drawl of ground water/surface water required for the project from the competent authority.
- v. A certificate of adequacy of available power from the agency supplying power to the project along with the load allowed for the project should be obtained.
- vi. All other statutory clearances such as the approvals for storage of diesel from Chief Controller of Explosives, Fire Department, Civil Aviation Department shall be obtained, as applicable, by project proponents from the respective competent authorities.
- vii. The provisions for the solid Waste (Management) Rules, 2016, e-Waste (Management) Rules, 2016, and the Plastics Waste (Management) Rules, 2016 shall be followed.
- viii. The project proponent shall follow the ECBC/ECBC-R prescribed by Bureau of Energy Efficiency, Ministry of Power Strictly.
- ix. The project area shall be secure through boundary wall and excavated top soil shall not be used in filling of low lying area. The top soil shall be used for greenery development.

II. Air quality monitoring and preservation

- i. Notification GSR 94(E) dated: 25/1/2018 MoEF & CC regarding Mandatory implementation of Dust Mitigation Measures for Construction and Demolition Activities for project requiring Environmental Clearance shall be complied with.

- ii. A management plan shall be drawn up and implemented to contain the current exceedance in ambient air quality at the site.
- iii. The project proponent shall install system to carryout Ambient Air Quality monitoring for common/criterion parameters relevant to the main pollutants released covering upwind and downwind directions during the construction period.
- iv. 02 Diesel power generating sets as 1 no. x 250 kVA & 1 no. x 600kVA are proposed as source of backup power should be of enclosed type and conform to rules made under the Environment (Protection) Act, 1986. The height of stack of DG sets should be equal to the height needed for the combined capacity of all proposed DG sets. Use of low sulphur diesel. The location of the DG sets may be decided with in consultation with State Pollution Control Board.
- v. Construction site shall be adequately barricaded before the construction begins. Dust, smoke & other air pollution prevention measures shall be provided for the building as well as the site. These measures shall include screens for the building under construction, continuous dust/ wind breaking walls all around the site plastic/tarpaulin sheet covers shall be provided for vehicles bringing in sand, cement, Murram and other construction materials prone to causing dust polluting at the site as well as taking out debris from the site.
- vi. Sand, Murram, loose soil, cement, stored on site shall be covered adequately so as to prevent dust pollution.
- vii. Wet jet shall be provided for grinding and stone cutting.
- viii. Unpaved surface and loose soil shall be adequately sprinkled with water to suppress dust.
- ix. All construction and demolition debris shall be stored at the site (are not dumped on the roads or open spaces outside) before they are properly disposed. All demolition and construction waste shall be managed as per the provisions of the Construction and Demolition Waste Rules, 2016.
- x. The diesel generator sets to be used during construction phase shall be low sulphur diesel type and shall conform to Environmental (Protection) prescribed for air and noise emission standards.
- xi. The gaseous emission from DG sets (1 no. x 250 kVA & 1 no. x 600kVA) shall be dispersed through adequate stack height as per CPCB standards. Acoustic enclosure shall be provided to the DG sets to mitigate the noise pollution. Low sulphur diesel shall be used. The location of the DG set and exhaust pipe height shall be as per the provisions of the Central Pollution Control Board (CPCB) norms.
- xii. For indoor air quality the ventilation provisions as per National Building Code of India.

III Water quality monitoring and preservation

- i. The natural drain system should be maintained for ensuring unrestricted flow of water. No construction shall be allowed to obstruct the natural drainage through the site, on wetland and water bodies. Check dams, bio-swales, landscape and other sustainable urban drainage systems (SUDS) are allowed for maintaining the drainage pattern and to harvest rain water.
- ii. Buildings shall be designed to follow the natural topography as much as possible. Minimum cutting and filling should be done.
- iii. The total water requirement - 207.370 KLD, Fresh Water Requirement - 70.880 KLD, Total Recycled Water generated -136.42, out of which **56.83 KLD** recycled water will be used for flushing & 12.59 KLD water will be used for horticulture & Basement Wash.
- iv. The quantity of fresh water usage, water recycling and rainwater harvesting shall be measured and recorded to monitor the water balance as projected by the project proponent. The record shall be submitted to the Regional Office, MoEF & CC along with six monthly Monitoring reports.
- v. A certificate shall be obtained from the local body supplying water, specifying the total annual water availability with the local authority, the quantity of water already committed the quantity of water allotted to the project under consideration and the balance water available. This should be specified separately for separately for ground water and surface water sources, ensuring that there is no impact on other users.
- vi. At least 11% of the open spaces as required by the local building bye-laws shall be previous. Use of Grass pavers, paver blocks with at least 50% opening, landscape etc. would be considered as previous surface.
- vii. Installation of dual pipe plumbing for supplying fresh water for drinking, cooking and bathing etc and other for supply of recycled water flushing, landscape irrigation, car washing, thermal cooling, conditioning etc. shall be done.
- viii. Use of water saving devices/fixtures (Viz. low flow flushing systems; use of low flow

- faucets tap aerators etc) for water conservation shall be incorporated in the building plan.
- ix. Separation of grey and black water should be done by the use of dual plumbing system. In case of single stack system separate recirculation lines for flushing by giving dual plumbing system be done.
 - x. Water demand during construction should be reduced by use of pre-mixed concrete, curing agents and other best practices referred.
 - xi. The local bye-law construction on rain water harvesting should be followed. If local by-law provision is not available, adequate provisions for storage and recharge should be followed as per the Ministry of Urban Development Model Building bylaws, 2016. Rain water harvesting recharge pits/storage tanks shall be provided for ground water recharging as per the CGWB norms.
 - xii. A rain water harvesting plan needs to be designed where the recharge bores of minimum one recharge bore per 5,000 square meter of built up area and storage capacity of minimum one day of total fires water requirement shall be provided. In areas where ground water recharge is not feasible, the rain water should be harvested and stored for reuse. The ground water shall not be withdrawn without approval from the Competent Authority.
 - xiii. For rainwater harvesting, 01 recharge pits will be constructed for harvesting rain water. The total recharge capacity of these pits about 28 m³/hr. Mesh will be provided at the roof so that leaves or any other solid waste/debris will be prevented from entering the pit.
 - xiv. The RWH will be initially done only from the roof top. Runoff from green and other open areas will be done only after permission from CGWB.
 - xv. All recharge should be limited to shallow aquifer.
 - xvi. No ground water shall be used during construction phase of the project.
 - xvii. Any ground water dewatering should be properly managed and shall conform to the approvals and the guidelines of the CGWA in the matter. Formal approval shall be taken from the CGWA for any ground water abstraction or dewatering.
 - xviii. The quality of fresh water usage, water recycling and rainwater harvesting shall be measured and recorded to monitor the water balance as projected by the project proponent. The recorded shall be submitted to the Regional Office, MoEF & CC along with six monthly Monitoring report.
 - xix. Sewage shall be treated in the STP (Capacity – 175 KLD based on MBBR technology). The treated effluent from STP shall be recycled/re-used for flushing, AC make up water and gardening. As proposed, no treated water shall be disposed in to municipal drain.
 - xx. The waste water generated from the project shall be treated in STP of 175 KLD capacity (based on MBBR technology) and then reused for various purposes. No water body or drainage channels are getting affected in the study area because of this project.
 - xxi. No sewage or untreated effluent water would be discharged through storm water drains.
 - xxii. Periodical monitoring of water quality of treated sewage shall be conducted. Necessary measures should be made to mitigate the odour problems from STP.
 - xxiii. Sludge from the onsite sewage treatment including septic tanks, shall be collected, conveyed and disposed as per the Ministry of Urban Development, Control Public Health and Environmental Engineering Organization (CPHEEO) Manual on Sewerage and Sewage Treatment Systems, 2013.

IV. Noise monitoring and prevention

- i. Ambient noise levels shall conform to residential area/commercial area/industrial area/silence zone both during day and night as per Noise Pollution (Control and Regulation) Rules, 2000. Incremental pollution loads on the ambient air and noise quality shall be closely monitoring during construction phase. Adequate measures shall be made to reduce ambient air and noise level during construction phase, so as to conform to the stipulated standards by CPCB/SPCB.
- ii. Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly

compliance report.

- iii. Acoustic enclosures for DG sets, noise barriers for ground run bays, ear plugs for operating personnel shall be implemented as mitigation measures for noise impact due to ground sources.

V Energy Conservation measures

- i. Compliance with the Energy Conservation Building Code (ECBC) of Bureau of Energy Efficiency shall be ensured. Building in the State which have notified their own ECBC, shall comply with the State ECBC.
- ii. Outdoor and common area lighting shall be LED.
- iii. Concept of passive solar design that minimize energy consumption in buildings by using design elements, such as building orientation, landscaping, efficient building envelope, appropriate fenestration, increased day lighting design and thermal mass etc. shall be incorporated in the building design. Wall, window, and roof u-values shall be as per ECBC specifications.
- iv. Energy Conservation measures like installation of CFLs/LED's for the lighting the area outside the building should be integral part of the project design and should be in place before project commissioning.
- v. Solar, wind or other renewable energy shall be installed to meet electricity generation equivalent to 1% of the demand load or as per the state level /local building bye-laws requirement, which is higher.
- vi. Solar power shall be used for lighting in the apartment to reduce the power load on grid. Separate electric meter shall be installed for solar power. Solar water heating shall be provided to meet 20% of the hot water demand of the commercial and institutional building or as per the requirement of the local building bye-laws, whichever is higher. Residential buildings are also recommended to meet its hot water demand from solar water heaters, as far as possible.

VI Waste Management

- i. Total waste 570Kg/Day and these all type of waste shall be treated/ disposed off as per provision made in the MSW Rules 2016.
- ii. Twin bin waste collection system will be used within the complex – green bins for bio-degradable wastes and blue bins for non-biodegradable wastes shall be provided.
- iii. Sale of recyclable waste like news papers, cartoon, bottles, canes etc to recycling industry.
- iv. A certificate from the competent authority handling municipal solid wastes, indicating the existing civic capacities of handling and their adequacy to cater to the MSW generated from project shall be obtained.
- v. Disposal of muck during construction phase shall not create any adverse effect on the neighboring communities and be disposed taking the necessary precautions for general safety and health aspects of people, only in approved sites with the approval of competent authority.
- vi. Separate wet and dry bins must be provided in each unit and at the ground level for facilitating segregation of waste. Solid waste (0.4 ton/day) shall be segregated into wet garbage and inert materials.
- vii. All non-biodegradable waste shall be handed over the authorized recyclers for which a written lie up must be done with the authorized recyclers.
- viii. Any hazardous waste generated during construction phase, shall be disposed off as per applicable rules and norms with necessary approvals of the State Pollution Control Board.
- ix. Use of environment friendly materials in bricks, blocks and other construction materials, shall be required for at least 20% of the construction materials quantity. These include fly ash brick, hollow bricks, AACs, Fly Ash Lime Gypsum block, compressed earth blocks and other environmental friendly materials.
- x. Fly ash should be used as building material in the construction as per the provisions of Fly Ash Notification of September, 1999 and amended as on 27th August, 2003 and 25th January, 2016 Ready mixed concrete must be used in building construction.
- xi. Any wastes from construction and demolition activities related thereto shall be

- managed so as to strictly conform to the construction and Demolition Rules, 2016.
- xii. Used CFLs and TFLs should be properly collected and disposed off/sent for recycling as per the prevailing guidelines/rules of the regulatory authority to avoid mercury contamination.

VII Green Cover

- i. Total 120 trees shall be planted in the area of 610 m² (11 % of total plot area) which is developed as greenbelt development as per following scheme.

Species	Location	Spacing	Area	Remark
Combination of • Milingtonia • Kigellia Pinnale (Ficus species) • Polyalthia Longifolia • (Pencil Ashok) • Granillia Robsta	At Left side of the building along the boundary wall	5 mt between two trees and for pencil ashok, the distance will be the 2 mt between 02 trees	305 sq mt	Between two trees there will be flower beds to beautifying the campus.
Combination of • Polyalthia • Longifolia • (Pencil Ashok) • Granillia Robsta • Milingtonia	At right side of the building along the boundary wall	5 mt between two trees and for pencil ashok, the distance will be the 2 mt between 02 trees	305 sq mt	Between two trees there will be flower beds to beautifying the campus.
			610	

- i. Not tree can be felled/transplant unless exigencies demand. Where absolute necessary, tree felling shall be with prior permission from the concerned regulatory authority. Old trees should be retained based on girth and age regulations as may be prescribed by the Forest Department. Plantations to be ensured species (cut) to species (Planted).
- ii. Where the trees need to be cut with prior permission from the concerned local Authority, Compensatory plantation in the ratio of 1:10 (i.e. planting of 10 trees for every 1 tree that is cut) shall be done and maintained. Plantations to be ensured species (cut) to species (planted). Area for green belt development shall be provided as per the details provided in the project document.
- iii. Topsoil should be stripped to depth of 20 cm from the areas proposed for buildings, roads, paved areas, and external services. It should be stack plied appropriately in designated areas and reapplied during plantation of the proposed vegetations on site.
- iv. PP shall explore the possibility of developing roof top garden/green space.

VIII Transport

- i. A comprehensive mobility plan, as per MoUD best practices guidelines (URDPFI), shall be prepared to include motorized, non-motorized, public and private network. Road should be designed with due consideration for environment and safety of users. The road system can be designed with these basic criteria.
- Hierarchy of roads with proper segregation of vehicular and pedestrian traffic
 - Traffic calming measures.
 - Proper design of entry and exit points
 - Parking norms as per local regulation
- ii. Vehicles hired for bringing construction material to the site should be in good condition and should have a pollution check certificate and should conform to applicable air and noise emission standards be operated only during non-peak hours.
- iii. Total proposed Parking's arrangement for 196 ECS .
- iv. A detailed traffic management and traffic decongesting plan shall be drawn up to ensure that the current level of service of the road within a 05 Kms radius of the project as maintained and improved upon after the implementation of the project. This plan

should be based on cumulative impact of the development and increased habitation being carried out or proposed to be carried out by the project or other agencies in this 05 Kms radius of the site in different scenarios of space and time and the traffic management and the PWD/competent authority for road augmentation and shall also have their consent to the implementation of components of the plan which involve the participation of these departments.

IX Human health issues

- i. All workers working at the construction site and involved in loading, unloading, carriage of construction material and construction debris or working in any area with dust pollution shall be provided with dust mask.
- ii. For indoor air quality the ventilation provisions as per National Building Code of India.
- iii. Emergency preparedness plan based on the Hazard identification and Risk Assessment (HIRA) and Disaster Management Plan shall be implementation.
- iv. Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile, STP, safe drinking water, medical health care, crèche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
- v. Occupational health surveillance of the workers shall be done on a regular basis.
- vi. A First Aid Room shall be provided in the project both during construction and operations of the project.

X EMP & Corporation Environment Responsibility

- i. For Environment Management Plan PP has proposed Rs. 103.3 Lakhs as capital and Rs. 30.05 Lakhs as recurring cost for this project.
- ii. For this project PP has proposed Rs 35.00 Lakhs as Corporate Environment Responsibility (CER) for remaining project component which is also include for Provision of fund for Wild Life Adaptation at Ralamandal Sanctuary, Indore as follows:-

SN	Plan	Area of Activity	Budgetary provisions (Rs in lacs)
1	Provision of fund for wild life habitat programme	Ralamandal Sanctuary, Indore	Rs 10 Lacs
2	Adaptation of school with provision of furniture (50 table and chairs in each class room), Fans at each rooms, Library, Up gradation of toilets (4 for girls and 04 for boys), Drinking water facility (RO)- 04 numbers), sport ground, and boundary wall.	School at forest village at Nahar Jhabua.	Rs 10 Lacs
3	Provision of essential facility like utensil, fans, mattresses, clothes other house hold facilities in consultation with the operator of old age home for needful requirement.	Old age homes (2 no) at Pitra Parvat and Apna Ghar located at Indore	Rs 10 Lcas
4.	Charagah Development in Pedmi Gaushala of ahilya Devi Trust, Indore and adjoining villages.		Rs 05 Lcas
