Sub: Credible action for project Fortune Soumya Tulip Greens of M/s Fortune Soumya Housing
CASE NO - 2338/2015

Dear Sir,

After obtaining permissions form T & CP and Municipal Corporation, we had started construction work. Later on as soon as we were informed by our consultant that our built up rea of more than 20000 Sq. Mtrs, thus it falls under purview of E. C. Accordingly we had stopped our work, in the meantime we had completed 60% construction at site. We agreed that the construction was done due to non-awareness of law.

We are submitting affidavit copy of the resolution passed in our meeting of partners of the Firm.

Kindly take the above stated submission in your kind consideration

RESOLUTION PASSED IN THE MEETING OF PARTNERS OF M/S FORTUNE SOUMYA HOUSING

A meeting Partners was conducted to resolve the issue of violation committed in our housing project FORTUNE SOUMYA TULIP GREENS pertaining to EIA Notification 203 and its provisions. The matter of violation was placed before the both CO-Land owners. Following was brought to the notice of the owners.

That, it was brought to the notice of the CO-owners that the housing project comprising construction activity of more than 20000 m² requires prior Environmental Clearance (EC) under the provisions of EIA Notification 2006 from competent authority.

As per the above said statement we have not applied for the Environmental Clearance before starting the construction activities, which is violation of the provision of EIA Notification. However, now an application along with the requisite document has been submitted with SEIAA for obtaining EC.

We have taken the issue seriously reviewed and discussed the environment related policy of the project exhaustively.

Taking into account the above facts the Co-Land owners passed the following Resolution and Undertaking:

We should have applied and obtained prior EC immediately after planning for construction of more than 20000 m² and the construction activity was taken without obtaining the same for our project in question which is violation of the provision of EIA Notification and punishable under EP (Act) 1986. However, now an application along with the requisite document has been submitted with SEIAA for obtaining EC. We are now well aware of all the Environmental legislations as applicable to this project and ensure to follow the provisions of all the Environmental legislations. It is also submitted that such violation will not be repeated by us in future.
