## Minutes of the 401<sup>st</sup> Meeting of SEIAA dated. 13.01.2017

".....The case was presented by the PP and their consultant and during presentation, it was observed by the committee that as per the Google image of November, 2015, > 70% of the area is submerged in the water and only 30% of the area is available for mining. Committee recommends that since the sanctioned volume is only 10,000 cum/year, same can be evacuated from the remaining un-submerged area. Committee also observed that concerned Mining Officer vide letter no. 386 dated: 24/06/16 has reported that there are no more mines operating or proposed within 1000 meters around the said mine and thus it is obvious that there will be no mine within 500 meters. However, thus committee suggested PP to submit revised MO certificate of leases within 500 meters to SEIAA..

The EMS and other submissions made by the PP were found to be satisfactory and acceptable, hence committee decided to recommend the case for grant of prior EC subject to the following special conditions in addition to the standard conditions at annexure 'B':"

*".....The case was presented by the PP and their consultant wherein it was observed as per the Google image of May, 2016 based on the co-ordinates provided by the PP that >40% part of lease is submerged in water and also another river is joining the lease from the North Eastern side. In the approved mine plan out of 1,12,000 sq. meter area only 68,975 sq. meter area is found suitable for mining. Thus PP was asked to submit revised operational production plan considering the area under submergence and leaving at-least 100 meters area from the river joining the lease. PP submitted that accordingly they have prepared the revised operational production plan. As per the revised operational production plan submitted by PP, only 37,320 sq. meter area is available for sand mining leaving the area under submergence, barrier zone and non- mining area as per approved mine plan. Thus committee after deliberation decided that since the available mining area is 37,320 sq. meter and the approved depth as per mine plan is 02 meters, only 74,640 cum/year sand can be evacuated from this lease....."*
