..... Today this case was again scheduled as PP vide letter dated-21/06/2017 has submitted the Revised Operational Production Plan of the lease as desired by the committee in the 80th SEACII meeting dated-14/06/2017. Committee after perusal of the documents submitted by the PP observed that according to the revised operational production plan only 40606 Sq.m area is available for the mining activities (19871 Sq.m area is deducted due to existence of bridge and submergence in the water + 19543 Sq.m of area deducted due to confluence of other river). As per approve mining plan the sanctioned depth of the lease is 2.5 m. Thus total volume of sand that can be evacuated from this lease is 1,01,515 cum/year. Committee after deliberations decided that, only 40606 Sq.m area is minable after deducting the submerged area due to bridge and joining of another river only 1,01,515 cum/year sand can be evacuated. The other submissions made by PP were found satisfactory and acceptable and thus the committee decided to recommend the case for grant of prior EC subject to the following special conditions in addition to the standard conditions at annexure 'B':

Based on the above recommendation, it was decided to grant Prior Environmental Clearance subject to the following specific conditions in addition to the conditions imposed by SEAC :-

- (ii). The production capacity shall be limited to the quantity approved by SEAC.

- 12. Case No.4370/15** Shri Kailash Chandra Gupta, M/s Shiva Corporation India Pvt. Ltd., 312, Ganpati Plaza, MIG Road, District-Jaipur (Raj.) Prior Environment Clearance for approval of Sand Quarry in an area of 24.747 ha. (1,73,223 cum/year) at Khasra no -870, 973, 1011/1, 1012, Village-Bhesnari, Tehsil-Dabra, District-Gwalior (MP)

This case was recommended in 81st SEAC meeting dated 22-06-17 and it was recorded that :-

.....SEIAA vide letter no. 837/SEIAA/17 dated 22/06/2017 has sent back the file to SEAC for appraisal stating that Collector, Gwalior has submitted a report dated 26/05/2017 which was placed before the committee. Committee on perusal of the report submitted by the mining officer sent vide letter no. 1125 dated 26/05/2017 observed that MO has mentioned in the report that a stop dam is in existence in the sanctioned lease and thus lease is submerged in water on the upstream side of the stop dam. MO further submitted that the availability of sand is also negligible. Considering the report of MO committee after deliberations decided that since lease is submerged in water on the upstream due to the stop dam and availability of sand is also negligible, case should not considered for grant of EC.

As per above recommendation of SEAC, it has been decided not to issue EC in this case on above grounds and case is hereby closed. Copy to PP and all concerned
